Board-to-Wire Swing-Lock Connector for Low-Profile Power Source

DF61 Series

Features

1.Reinforced Swing Lock Structure

Our unique swing-lock structure cradles the wire side plug and resists the plug from becoming disengaged due to handling strain or loads.

2. Header Lock Improves Plug Retention

During mating, the header lock engages with the plug assembly. The lock is reinforced with metal which adds strength to the lock and increases the retention between the header and the plug.

3.Compact Size- High Voltage

The compact 2.2 mm pitch connector has a voltage rating of 350V due to the long creep distance.

4.Solder Wicking Prevention

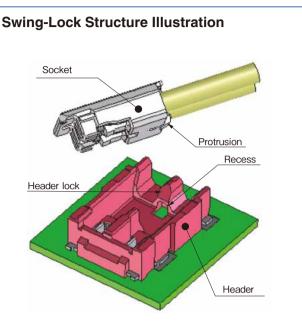

Header is molded in one piece. This ensures a tight fit between the contact and the header and prevents solder wicking.

5. High Current of MAX 5 Amps (AWG22)

A highly conductive material is used for the contacts. The material provides for a high current flow by reducing the contact resistance.

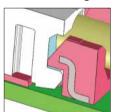

Applications

Digital cameras, digital video cameras, LED lights, laptop computers, tablet computers, portable devices, power supply equipment, etc.

The protrusion on the bottom side of the socket fits into a corresponding recess on the header. This aligns the socket into the correct mating position.

Before Mating Header Lock **Beinforced with Metal**

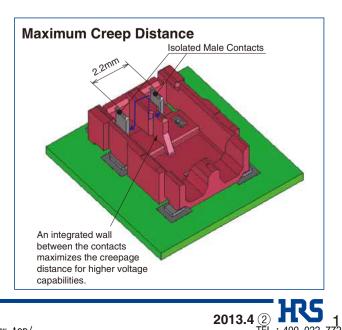

After Mating

The Header pushes down the protrusion of the socket and locks it in place.

TEL: 400-022-77

The metal fitting is partly molded in the header's housing lock.

Tensile strength of the cable: 10N or greater

■Product Specifications

Ratings	Current rating	3.2A (with AWG26) 4A (with AWG24) 5A (with AWG22)	Operating Temperature Range Operating Humidity Range	-35~85℃ 20~80%	(Note 1)	
	Voltage rating	AC/DC 350V	Storage Temperature Range Storage Humidity Range	-10~60℃ 40~70%	(Note 2) (Note 2)	
Items	Specific	cations	Condi	itions		
1.Insulation resistance	1000MΩ or greater		Measured at DC 500V			
2.Withstanding voltage	No flashover or breakdo	own	AC1700V applied for one minu	te		
3.Contact resistance	10mΩ or less		Measured at 20mV or less, 1mA			
			Frequency 10-55Hz, half amplitude 0.75 mm, 10 cycles for			
4.Vibration resistance	No electric outage of 1	us or more	each of 3 directions			
5.Shock resistance	No electric outage of 1	us or more	Acceleration 490 m/s ² , 11ms; h directions	alf sin wave: 3 e	ach for 3	
6.Humidity resistance	Contact resistance 20m resistance 500MΩ or gr	,	Temperature 40 \pm 2°C, humidit	y 90-95%, left fo	r 96 hours	
7.Temperature cycle	Contact resistance $20m\Omega$ or less insulation resistance $500M\Omega$ or greater		5 cycles (-55℃: 30 minutes → 9 minutes → 5-35℃: 2-3 minutes		tes → 85℃: 30	
8.Insertion/extraction life	Contact resistance20m	Ω or less	Insertion/extraction: 30 times			
9.Solder heat resistance	No melting of resin part	affecting performance	Reflow: Per recommended tem Hand solder: Manual soldering	• •	or 3 seconds	

(Note 1) Includes temperature elevation by conduction.

(Note 2) The term "storage" refers to the long-term storage conditions of unused connectors before PCB mounting. The operating temperature range applies to connectors in non-conduction state after PCB mounting or those in temporary storage during transportation, etc.

(Note 3) The above specifications are representative for this series. Please refer to "delivery specifications" for official individual agreement.

Materials

Product	Part Material		Treatment	Specification
Header	Insulator	LCP resin	Red	UL94V-0
Header	Contact	Brass	Tin plated	
Crimp Socket	Insulator	PBT	Red	UL94V-0
Crimp contact	Contact	Copper Alloy	Tin plated

	HT305/DF61-2226S	CL550-0304-2-00	DF61-2226SCF
Extraction Tool	DF-C-PO(B)	CL550-0179-2-00	DF61-2628SCF, DF61-2226SCF

Note: Problems resulting from the use of non-authorized tools will not be warranted.

Operating Precautions

1. Recommended Temperature Profile								
(Lead-free soldering possible)	10sec MAX MAX 250							
	250							
	220°C							
	200							
	$180^{\circ}C$							
	<u>ل</u> <u>ال</u> 150							
	50							
	90~120sec 60sec MAX							
	PRE-HEATING TIME SOLDERING TIME							
	[Applicable Conditiona]							
	[Applicable Conditions] 1. Peak Temperature: MAX 250°C							
	2. Heated Area: 220°C or above, within 60 sec.							
	3. Pre-heating Area: 150-180°C, 90-120 sec.							
	 4. Number of Operation: Twice or less * The contact lead area was measured. 							
	The conditions may change depending on the types and manufacturers of cream solder, PCB size, and conditions of other materials used for soldering. Please fully check the soldering condition before use. [Remarks 1] This temperature profile is our recommended value.							
	Soldering iron temperature: $350 \pm 10^{\circ}$ C, soldering time: within 3 seconds							
2. Recommended Hand Solder Conditions								
3. Recommended Screen Thickness, Aperture	Thickness 0.1 mm, aperture opening rate: 100%							
Opening Rate (Pattern Area Ratio)	Thickness 0.1 mm, apendre opening fate. 100%							
4. PCB Warpage	Max 0.02 mm at the center of connector with the both edges of the connector as							
	the baseline							
5. Cleaning Condition								
	Cleaning with IPA is possible. (Cleaning is not recommended as it may change the fact of incertion (autoction, etc. Places account with up when using other types							
	the feel of insertion/extraction, etc. Please consult with us when using other types of cleaning agents.)							
6. Precautions	■ In order to maintain the performance reliability, do not insert the crimp contact							
	into the crimp socket at a slant angle.							
	■ Insertion/extraction of the connector while not mounted to the PCB may cause							
	 breakage or deformation to the contact. Extracting the connector by holding the cable could result in a breakage. Do not apply flux at the time of hand coldering, on it may result in flux rise. 							
	 Do not apply flux at the time of hand soldering, as it may result in flux rise. This product may have slightly different hue on molded items, however, they do 							
	not affect the product performance.							
	See the separate "DF59 Insertion/Extraction Procedure Manual" for handling							
	precautions at the time of insertion and extraction.
