Simple Assembly In-Line Power Connectors for up to 130A

EF1 Series

Product Specifications

Features

1. Simplified assembly

The crimp contact itself becomes the connector in a few simple steps by crimping the contact directly to the power cable and then inserting it into the housing.

2.Quick, snap in lock

Its snap-in structure reduces assembly costs due to its simplicity and ability to reduce wiring steps. This connector does not need screws like traditional terminal block connectors.

- **3.130A rated current capacity when using 38mm² cable** Supports 5.5, 8, 14, and 22mm² cables by utilizing a sleeve to convert the conductor diameter to 38mm².
- 4. Multiple mounting options Attached to a DIN rail or secured to a panel, this connector is versatile enough to be used in a wide range of mounting applications.
- 5. Simplified crimp terminations No special tools are required.
- 6. Equipped with guide keys Guide keys are used to prevent incorrect wiring.
- **7. Pending TÜV, UL certifications** Testing is underway to get this series qualified for various safety standards.

8. RoHS compliant

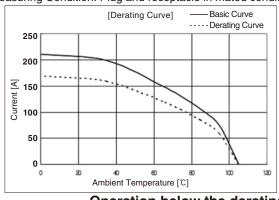

All materials and substances used to produce this product comply with the RoHS compliant standards.

	Rated Voltage		AC 600V,DC 600V	
Ratings	Rated Current 94A w		with 38mm² cable /ith 22mm² cable /ith 14mm² cable	50A with 8mm ² cable 40A with 5.5mm ² cable
	Operating Temperature Range	Dperating Temperature Range -25°C to +105°C (Note)		105℃ (Note)
	Storage Temperature Range		−10°C to +60°C	
Items	Specifications		Conditions	
1. Contact Resistance	0.5mΩ max		Measured with DC 1A	
2. Insulation Resistance	1,000MΩ min		Measured with DC 500V	
3. Withstanding Voltage	No flashover or breakdown		AC 3310V for 1 minute	
5. Durability	 Contact Resistance : 1mΩ max Inserting and Extracting Force : 150N max 		30 mating cycles	
			-55°C : 30 minutes	→ Room temperature : 2
6. Temperature Cycles	Insulation Resistance : 1,000M Ω min		to 3 minutes → 105°C : 30 minutes → Room	
			temperature : 2 to 3 minutes 5 cycles	
7. Salt Water Spray	Should not have functional problems		5% concentration c	of salt water, left for 48 hours
8.Humidity resistance	Insulation Resistance : $10M\Omega$ min (in high humidity)		Temperature 40°C,	humidity 90 to 95%,
(steady state)	100MΩ min (dry)		96 hours	

Note : Operating temperature range includes the temperature rise by current carrying.

[Reference] Derating curve and temperature rise curve

Measuring Condition: Plug and receptacle in mated condition, assembled with 38mm² conductor size cable

Operation below the derating curve (dotted line) is recommended.

Note : Derating curve could vary depending on cable type and measurement even under the same conditions. Therefore, the data noted above are reference values, not connector specifications.

Material / Finish

Component	Material	Finish	Remarks
Insulator	PBT resin	Black or Red or Blue	UL94V-0
Contact Spring			
Contact	Copper alloy	Tin plated	
Sleeve			

Product Number Structure

Refer to the chart below when determining the product specifications from the product number. Please select from the product numbers listed in this catalog when placing orders.

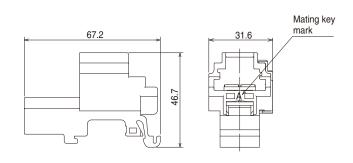

Connector

$\frac{EF\ 1}{\bullet} - \frac{38}{\bullet} \frac{R}{\bullet} \frac{A}{\bullet} - \frac{1}{\bullet} \frac{S}{\bullet} \frac{C}{\bullet} \frac{A}{\bullet} (*$	(**) <u>EF 1</u> - <u>38</u> - <u>22</u> (**) (**)				
Series Name : EF1	Contact Structure : S = Spring contact side				
2 Contact Size : 38 = 38-5 size contact	P = Non-spring contact side				
8 Connector Type :	Contact Termination Method : C = Crimp termination				
P = Plug R = Receptacle	B Mating Guide Display : 4 different keying options available from A to D				
None = Sleeve	Other specification differences are noted with (01), (02) to distinguish certain variations.				
4 Serial Symbol	 Supported Cables 22 = Supports an equivalent cable with 22mm² conductor cross section area 				
No. of Contacts : 1	14 = Supports an equivalent cable with 14mm ² conductor cross section area 8 = Supports an equivalent cable with 5.5 and 8mm ² conductor cross section area

Safety Precautions

\land Warning

- ●Do not touch the exposed conductor while it is energized, failing to follow this warning may cause an electric shock and injury. ▲
- •The power should be in the OFF position when inserting or extracting this connector.
- •After mating this connector, perform a light pull on the cable to ensure that it has been correctly mated and the locking process will hold it in place. If it is not mated correctly, then the cable will be removed. An incomplete mate can cause disconnection, contact failure and a significant danger threat.

Caution

- •This connector was designed to be used in a stable and stationary environment, do not try to operate this connector where vibrations will occur.
- •Please only use Hirose approved contacts, using unapproved contacts can result in a lowering of the product's performance and cause a serious accident. Please contact your local Hirose representative for additional information.
